

October 2024

Ref: Information on the Proposed Clooncunny Wind Farm

Dear Resident,

As you know RWE is investigating the possible development of a wind farm in the Clooncunny area, Co. Sligo. We last reached out to you in October 2023 last year when we shared the proposed locations of the 7 turbines (totalling 46.2MW) and the site access location. Since then our team has been continuing to carry out detailed ecological surveys and engineering studies that form part of the Environmental Impact Assessment Report (EIAR) which will accompany the planning submission.

As we work through these surveys and studies, we wanted to update you that we do not envisage submitting a planning application until next year. As soon as we have any further news, we will be back to you, well in advance of submitting the application.

As ever, as we progress through this engagement process I would be delighted to hear from you. If you have any questions about the project at any stage, please feel free to contact me on my mobile **087 151 9219** or by email at clooncunny@rwe.com. You can write to me at RWE Renewables Ireland Limited, Desart House, Lower New Street, Co. Kilkenny R95 H488.

Many thanks for your time and I look forward to meeting you in person in the near future.

Kind regards

Kieran
