Ref: Information on the Proposed Shancloon Wind Farm

Dear Resident,

We reached out to the community last April to let you know that RWE was investigating the development of a wind farm in the Shancloon area in Co. Galway. We called to over 200 homes within 2km of the proposed wind farm and we got to meet with people from almost half of the homes. We have had follow up calls and meetings with more since then. We would like to give you an short update as to our progress on the development.

We have submitted a pre-application consultation request for Strategic Infrastructure Development (SID) determination to An Bord Pleanála (ABP). We await the decision of ABP into this request and will communicate the decision once we obtain it. We are also continuing to work through the Environmental Impact Assessment Report and the Design works are ongoing. We would hope that the project layout will be finalised by the end of the year.

We would hope to be back to the community with a further update on the proposed wind farm later in the year at which time we will once again be dropping off a letter with updated information and will be calling door to door to answer any questions you might have at that time

Again, I would like to thank everyone who has submitted feedback and questions during the public consultations conducted to date and look forward to meeting you again hopefully before the end of the year.

Kind regards,

Kieran
